

Series CGPS Parallel grippers with double ball bearing guide

Single and double acting, magnetic, self-centering
Bores: Ø 10, 16, 20, 25, 32 mm

Thanks to the use of a high performing and precise force transmission system and to the double ball bearing guide, the Series CGPS grippers are able to provide high gripping forces while guaranteeing a very high repeatability and robustness (resistance to external static and dynamic loads).

The wide range of sizes available allows you to find the best solution for any handling need. The grippers can be supplied with bushes and centering plugs (tolerance H8) which, once positioned on the body and/or on the jaws, are able to guarantee, during maintenance, a high interchangeability of the gripper and of the extensions.

- » Robust, compact and light design
- » High closing/opening forces
- » Fixing from below and from the side
- » Supply on the side
- » Self-centering jaws
- » High closing and opening repeatability
- » High interchangeability (bushes and centering plugs)
- » Position detection (front and side) thanks to the use of Series CSD magnetic proximity switches
- » Protection against dust (IP40)
- » Finger types available: long with through-holes and flat with threaded holes
- » High resistance to external loads thanks to the double ball bearing guide
- » Variants available: for use in ATEX zones and for high temperatures
