

# Series ASP angle seat valves

2/2-way - Normally Closed (NC) and Normally Open (NO)  
2/2-way - Double Acting (DA)

The Series ASP angle seat valves are an efficient and cost-effective solution for fluid control. Their robustness is suitable for the most varied applications with inert gases and liquids, with steam or with fluids having solid particulates in suspension. Available with 3/8" to 2-1/2" threaded connections.

- » Differential pressure up to 20 bar
- » High flow
- » Low resistance of the flow
- » Anti-water hammer design
- » Compliant with Directive PED 2014/68/UE

The operation is determined by the pneumatic drive of a single acting, guided piston actuator with spring return. There are also models available with double acting actuators, without spring. For liquid media we recommend the models with flow direction under the seat. For gas or steam we recommend the models with flow direction above the seat.
