PRESSURE GAUGES

- » Radial connection
- » Rear connection
- » Panel mounting

To select the most suitable pressure gauge, the measurement range should be chosen considering the type of application according to the following criteria:

1. Constant pressure or pressure with slow fluctuations should be within 75% of the maximum scale value.
2. Pulsing pressure or rapid fluctuations should be within 65% of the maximum scale value.
3. Pressure peaks should never exceed the maximum scale value.
